INVITATION

PRINCETON NURSERIES AT THE HISTORIC TOWN OF PRINCETON invite you to spend a few hours with us any time you can arrange to do so.

You are interested in nurseries and we are sure you will enjoy a trip of inspection through our up-to-date plant, one of the largest in the East.

Then, too, Princeton is a rare historic town, dating back to Pre-Revolutionary days and we will be pleased personally to show you the many nearby points of interest.

CREDIT AND TERMS

We are glad to extend credit on the basis of our regular terms to established nurserymen who are known to us, or are rated satisfactorily. Cash before shipment is required from parties unknown to us, who have no commercial rating.

Terms, 2% 10 days, 1% 30 days from date of invoice, 60 days net, unless otherwise arranged on acceptance of order. Interest at 6% will be charged on all accounts from due date.

LIABILITY AND CLAIMS

LIAIBILITY AND CLAIMS
We are not liable for injury to stock from frost, hail, fire or other causes beyond our control, and book all orders with this understanding. Errors made by us will be gladly corrected, but complaints must be made within ten days after receipt of stock.

Plants become your property upon delivery to transportation company, and we cannot be responsible for loss, damage, or delay in transit.

PRICES

Prices are F.O.B. Kingston, N.J., and no boxing or packing charges will be made for stock in full carload lots.

NOTES IN EXPLANATION OF CATALOGUE

¶Boxed items call your particular attention to varieties on which we are offering especially attractive prices.

¶ The figures following each variety, indicate in feet the approximate height of that plant when mature. It must be understood, however, that many varieties in their native habitat greatly exceed this height, but soil and climatic conditions modify their growth and character to a variable extent, and allowance for this has been made in the heights given here.

We recommend that all varieties marked with an asterisk be lifted with a ball of earth and burlapped. Experience has shown that the loss in these plants, which is otherwise high, is reduced to a minimum if handled in this way. This will involve an extra charge per plant, as follows:

2'-4', 200 4'-6', 300 6'-8', 400 8'-10', 500 10'-12', 600

Larger sizes in proportion. In all instances where varieties are marked B. & B., these charges are included in the printed price.

RESERVATIONS—SPECIMEN PLANTS

For an additional 25% customers will be permitted to select and reserve specimen plants in the nursery blocks for future delivery.

NEW HARDY EVERGREEN BERBERIS

We have a good assortment of these new varieties which are very attractive in both dark green holly-like foliage and showy flowers. We consider this class of stock one of the most valuable additions to the broad leaved evergreens. As a class nearly all have large thorns, spined leaves, and color beautifully in the Winter months. Under favorable conditions most of them will attain a height of about six feet.

gagnepaini. Has long and very narrow holly-like leaf.

julianae. Fairly rapid growth with broader spined leaves.

laevis. Similar to *julianae*.

sargentii. Leaves very lightly spined, otherwise similar to *julianae* in habit.

triacanthophora. Rapid grower, dense habit and small, lightly spined leaves.

Juniperus Pfitzeriana. This extremely hardy variety of Juniper when well grown makes one of the finest evergreens for foundation plants. Note the perfect shape of plant in insert which was taken at random from thousands of others in the same block.

Juniperus canadensis is a plant not sufficiently well known. It develops into a beautiful specimen, always holding the vase shape, and the white line in each leaf gives the plant the appearance of a sprinkling of snow.

FRENCH LILACS—NAMED VARIETIES

These are all grown from cuttings and are on their own roots, which is the best way Lilacs can be grown, as they will not sucker. It is the most expensive way to grow them, but our prices compare favorably with the cheap, grafted stock. These named Lilacs generally grow from 6 to 12 ft. in height, depending on the variety and locality.
